Brightspace Learning Repository

Building a Community of Shared Resources

OVERVIEW

Brightspace Learning Repository is a content management system that enables you to effectively share content within your organization, manage multimedia resources, and collect learning resources from other repositories across the Web. Using standards-based content packaging, Learning Repository enables you to easily move objects in and out of the system, while maintaining their integrity.

Used as a stand-alone solution or integrated with Brightspace Learning Environment, along with the capability to access other repositories, you can build a community of shared resources to leverage subject matter expertise and promote quality content. Connect your organization with Learning Repository to explore and discover a wealth of learning materials.

KEY BENEFITS

Saves Time | With centralized storage, flexible browsing, and powerful full-text search capabilities, quickly locate and retrieve required material.

Supports Course Development | Deep integration with the course development tools in Brightspace Learning Environment lets you easily refresh your course with new resources.

Aligns Content to Learning Standards | Use advanced metadata editing to classify and organize resources to standards, for easy searching and deployment.

Encourages Collaboration | Promote the sharing of content and assessments using standards-based learning objects.

Improves Course Quality | Aggregate materials from a number of sources to leverage the knowledge of your educational community and improve course quality.

Reduces Costs | With an intuitive interface and exceptional performance you will achieve significant training, support and file storage cost savings.

BRIGHTSPACE LEARNING REPOSITORY IN ACTION

Brightspace Learning Repository enables you to aggregate materials from any number of sources including content publishers, other repositories, open educational resources, and libraries.

Learning Repository also encourages collaboration by making it easy to share and re-use learning objects, whether individual files, a particular topic, or an entire course, including assessments and quizzes.

Objects can be classified by keyword, publish date, learning standard, rating, or object type, and the powerful search capabilities make it quick and easy to search for the most relevant content.

You have control over who has access to the material and how it can be used – whether it can be downloaded, modified, or linked-to only.

Having all of your learning objects in one searchable repository gives you a single point of update, saving valuable time and effort.

Open up your organization to new possibilities with Learning Repository. With budget challenges and increasing global competition, the sharing of knowledge and collaboration across organizations significantly extends the reach of your institution.

The ability to leverage quality material in your course design provides diversity and enrichment. Cultivate endless opportunity for your instructors and learners through access to a wealth of learning materials.

ABOUT D2L

A global leader in EdTech, D2L is the creator of Brightspace, the world's first integrated learning platform. The company partners with thought-leading organizations to improve learning through data-driven technology that helps deliver a personalized experience to every learner, regardless of geography or ability. D2L's open and extensible platform is used by more than 1,100 clients and almost 15 million individual learners in higher education, K–12, healthcare, government, and the enterprise sector—including Fortune 1000 companies.
