

A learning management system (LMS) can relieve you of a great deal of your administrative work so you can focus on teaching. Here are the top 6 tools in your LMS that will enable you to be more efficient. But at the same time, the learning curve is quick because of how easy they are to use!

## 1. DRAG-AND-DROP

Easily create courses from scratch or migrate from another system. Simply drag documents, videos, PDFs, etc. from your desktop right into the LMS.

## 3. SIMPLE CONTENT EDITOR

Create engaging and interactive course elements using tools that look and feel like MS Word. Templates make it easy to ensure everything is accessible and looks awesome.

## 5. RELEASE CONDITIONS

Automatically provide remedial content or resources, triggered by specific conditions. Ensures students are supported and engaged.

## 2. CLASS PROGRESS

A heads-up display that allows you to quickly see who's doing great and who's struggling. From the same view, quickly send an email or instant message to students.

## 4. AUTOMATED MESSAGES

Send automated emails based on student activity. Choose when students need a little nudge, then just set and forget.

## 6. MOBILE ACCESS

You and your students can work anytime, and anywhere. Plus all your course material will look great on any device.
