Top 9 Reasons

D2L
DESIRE2LEARN

## Why Your Seminary Should Use Brightspace by D2L.

Reason 1

Teach how you want. The Brightspace platform supports a variety of teaching and learning modalities. Now you can offer your students online, hybrid or even self-paced programs to accommodate unique learning styles.

Reason 2

Easily reflect and continue on the path of learning. With ePortfolio, students can reflect on their learning throughout their time at your seminary and maintain access even after they graduate, providing the long-term support they'll need in practice.

Reason 3

Simple course creation. Instructors can quickly and easily drag and drop their content into the LMS, helping them build a course more easily. No more worrying about organizing content and files or needing a PhD in technology. Our easy-to-use solution can give your instructors more time in their day to focus on their students.

Reason 4

Keep an eye on student engagement. Our Class Progress tool allows faculty to easily monitor student performance and gain insight into which students might be struggling. Brightspace equips your instructors with all the information they need in order to help students in need.

Reason 5

Measure student success with ease. Your learning outcomes can be created and measured easily in Brightspace, allowing your instructors to provide any needed guidance to ensure they're supporting student success.

Reason 6

Simplify grading. Instructors can annotate papers directly in Brightspace, and even grade papers offline using our grading app.

Reason 7

Full mobile responsiveness. All students can access content on any device, ensuring a consistent experience for everyone so they can stay connected anywhere—both inside and outside the community.

Reason 8

More partner, less vendor. At D2L, we value each and every one of our partnerships. Our dedicated implementation team will work closely with you and your instructors to serve and support your seminary's unique needs during setup and implementation.

Reason 9

Future-proof your institution. Keep up with the changing needs of your students while still supporting your traditional learners. D2L's responsive design and microservices.
