Create a dynamic online learning experience with Brightspace

When students demonstrate skills and apply their knowledge on video, instructors get an authentic representation of what they can do. Video Assignments and Virtual Classroom form a holistic, synchronous and asynchronous video assessment solution that fosters active learning experiences.

Develop skills and knowledge with Video Assignments

Soft skills are a top priority for employers around the world. With the Video Assignments tool in the Brightspace platform, it's easy to implement experiential learning and video-based assessment into your courses, and develop soft skills through:
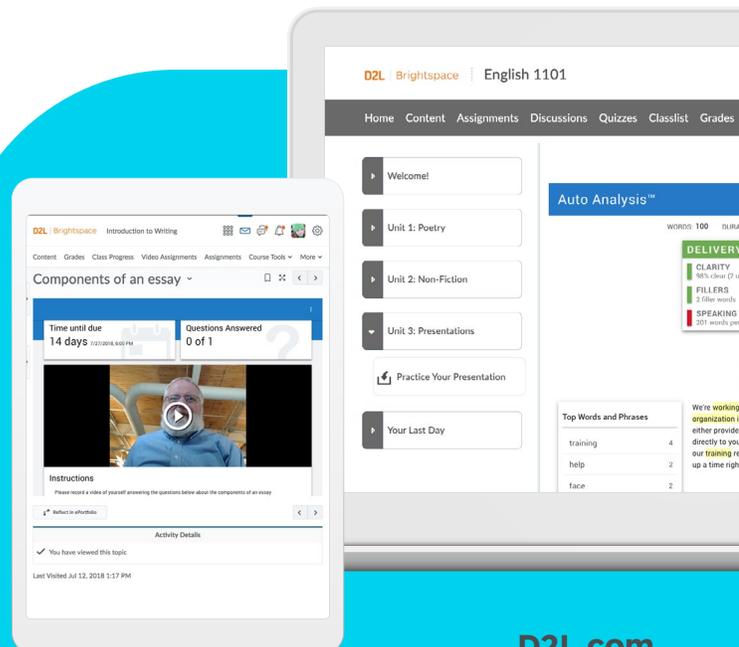

- Experiential learning exercises where learners apply their knowledge and demonstrate key soft skills,

- Personalized coaching and feedback features like self-assessment, peer review, and Auto Analysis™ capabilities, and

- Collaborative learning opportunities that can occur asynchronously or in real time.

Enable learners to put their skills and knowledge into action with:

- Individual Assignment: Help learners build communication and critical thinking skills through continuous practice, self-assessment, and video presentation delivery.

- Question & Answer: Put individuals on the spot to answer questions asynchronously with a limited time to respond. *(Premium)*

- Group Assignment: Enable learners to collaborate synchronously or asynchronously to complete a group activity. *(Premium)*

- Interactive Video: Prompt learners to answer multiple choice questions or submit video responses at different points throughout a video. *(Premium)*

Accelerate development and drive improvement through human and AI-powered feedback:

- Self-Assessment: Give learners multiple opportunities to practice and reflect on their recordings prior to submission.

- Auto Analysis™: Use auto-generated delivery and content metrics to help learners improve and gain more insight into their performance. *(Premium)*

- Expert Coaching: Deliver personalized, time-stamped feedback to learners via text and video comments.

- Peer Review: Expose learners to multiple perspectives by having them give and receive feedback on their peers' videos.

Connect and engage with Virtual Classroom

Leverage the potential of virtual conferencing to enhance learning in the Brightspace platform. The Virtual Classroom tool provides a space for live discussions, online office hours, video-based training, and more.

Collaborate during a session by sharing slides, files, and live views of your whiteboards or desktop. This feature can be integrated into Brightspace at no additional cost. Virtual Classroom makes it easy to schedule, manage and join live meetings without leaving the LMS

Two-way interaction
Engage and collaborate online with a video solution that supports a two-way conversation.

Make it easy
Schedule, hold, and record live video conferencing sessions without ever leaving the Brightspace platform.

We offer more
A premium version is available to help you expand the way you use the tool.
