

India: a period of reform for digital transformation

The pandemic is by no means the sole challenge presented to Indian universities looking to realise their digital transformation strategies in India

To understand how digital transformation is progressing, D2L has undertaken a survey of 4,830 higher education respondents from around the world, including India. The results show that, despite the challenges created by Covid-19 and the government's ambitious new National Education Policy, institutions have approached the transition with enthusiasm.
