

Singapore: digital transformation in education gains momentum

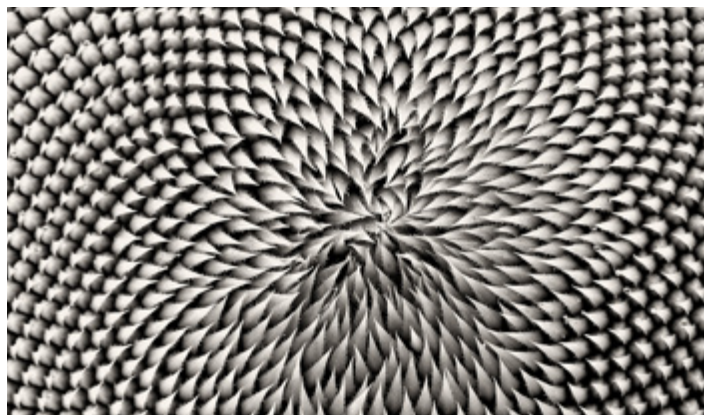

Digital transformation has been on the agenda for Singapore institutions for some years, but the sudden shift to remote learning in 2020 accelerated the pace of change

To understand how digital transformation is progressing, D2L has undertaken a survey of 4,830 higher education respondents from around the world, including Singapore. The results show that, even before the pandemic struck and moved teaching online, digital transformation in education was underway at a significant proportion of institutions in Singapore.

Read on to discover the key findings of the survey, and delve deeper into Singapore's digital transformation by registering to download the full eBook on the Asia-Pacific region.

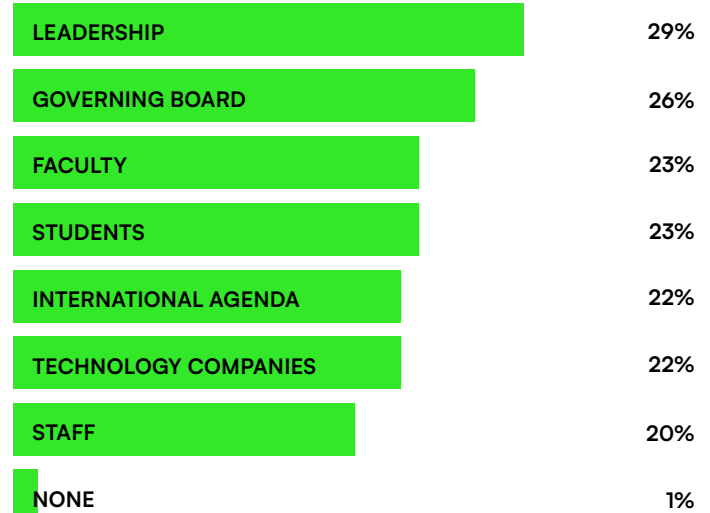

DID YOU KNOW?

The main desired outcomes of digital transformation are improving student retention and completion and measuring and improving learning outcomes
