

Purdue University creates a foundation for e-learning success with D2L Brightspace

Purdue University is a public research university located in West Lafayette, Indiana and is consistently ranked as one of the best public universities in the U.S.

Purdue University created Learning Online 101, a self-paced Brightspace course created to help students adapt to virtual and dynamic learning environments. The course materials were designed to help students find answers to common questions about virtual learning and connect them with the university's support services and learning resources.

AT A GLANCE

Client: Purdue University

Learners: 50,000+

Industry: Higher Education

Website: <https://www.purdue.edu/>

Platform/Features:

- Brightspace Core
- Performance Plus
- Awards Tool

Interviewees:

- Alexis Machinot, senior instructional designer
- Holly Fiock, senior instructional designer

Highlights:

- Goal was to help students adapt to virtual and dynamic learning environments, and give students the skills and confidence to set them up for long-term educational success.
- The Purdue team created a self-paced course, Learning Online 101, for students to engage with introduction content for virtual learning.
- The result was that 95.5 percent of respondents said they felt the content was helpful across all course modules.

“These materials were designed to help students find answers to common questions about virtual learning [...] and helping prepare students more holistically for learning by connecting students with the range of support services and learning resources available at Purdue”

Alexis Machinot
senior instructional designer
