# Anatomy of a Brightspace Page

Navbars are dependent on themes – you cannot construct a navbar without having defined a theme

Widgets are dependent on homepages – you cannot place a widget without having defined a homepage

# Page Layout

---

*Homepages are like a foyer to your home – a common area from which most spaces are accessible. They are a place where first impressions are made.*

*You want your homepages to be **clean** and **orderly** -- an **inviting** place guests can return to **orient** themselves. There should be **consistency** in what they expect to find there.*

# Org Structure and Page Layouts Considerations

## Organization

- setup / make active a separate homepage for your organization org unit
- do **NOT** share organization navbar / homepage

## “Other”

- is your org structured by other org unit types (school, department, company, etc)?
- should descending org unit be branded uniformly (i.e. course that descend from school A get a specific navbar / homepage and school B gets another)

## Course

- Assign the default status to theme / navbar / homepage which is most used
- consider what level of flexibility you want to provide to course designers / instructors for shaping course homepage and/or navbar (do you want your course default enforced?)

# Org Structure and Page Layouts Effective Practices

---

## Organization

- Something to get into courses (My Courses)
- Something to communicate global updates / key information to learners (Announcements)
- Something to help learners prioritize their work (Work-To-Do)
- Something social (i.e Twitter feed)
- Links to tools that are administrative in nature which can only be accessed by navbar (Course Updater, Discover, Data Hub, Manager Dashboard)

## Course

- Something to set course expectations / conduct (custom widget)
- Something to introduce instructors if instructor-led (profile widget)
- Something to navigate course content, either directly (New Learner Experience) or as a jumping off point (Visual Table of Contents)
- Something to communicate course-level update / changes (Activity Feed)
- Links to Progress tools (Class Progress, Grades)

# What are Themes, Navbars, Links?

---

## Themes

- Used to customize and brand the look and feel of navbars and pages
- Colors set affect the navigation and content tool
- Use of Logos can be used to direct users to different parts of the Brightspace Application

## Navbars

- Used to define which links are included in the navigation panel to help users navigate the targeted org unit
- Used to determine how links will render (text VS icon based)
- Depends on a Theme

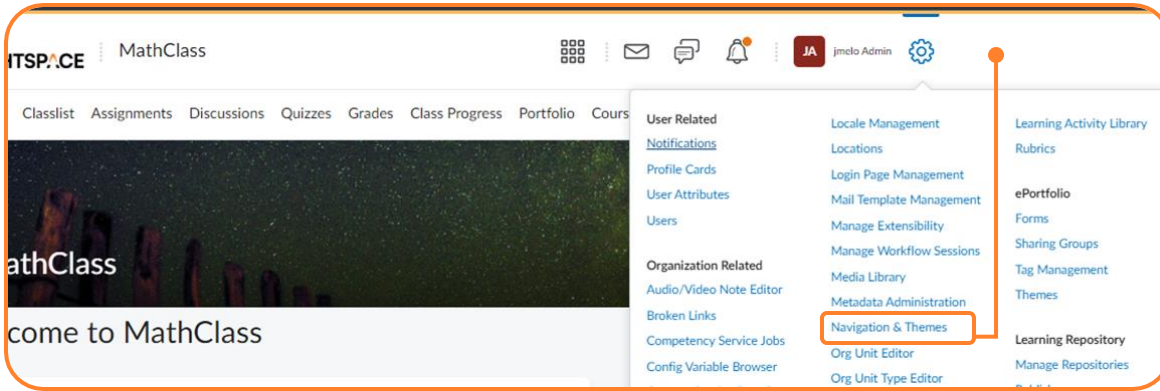

## Links

- 2 types of links: system links or custom links
- Links can be grouped in a link group

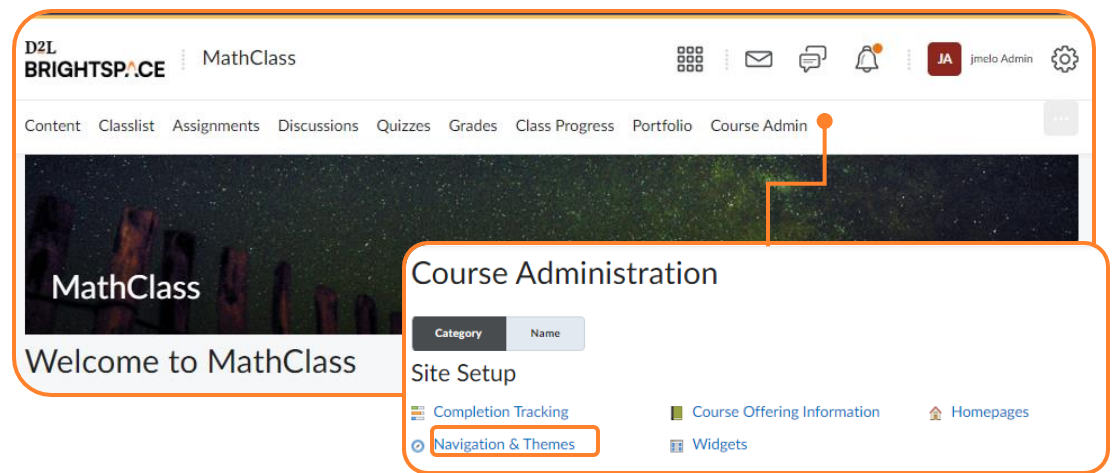

# Where to Access Themes / Navbars / Links?

## \*Admin Tools > Navigation & Themes

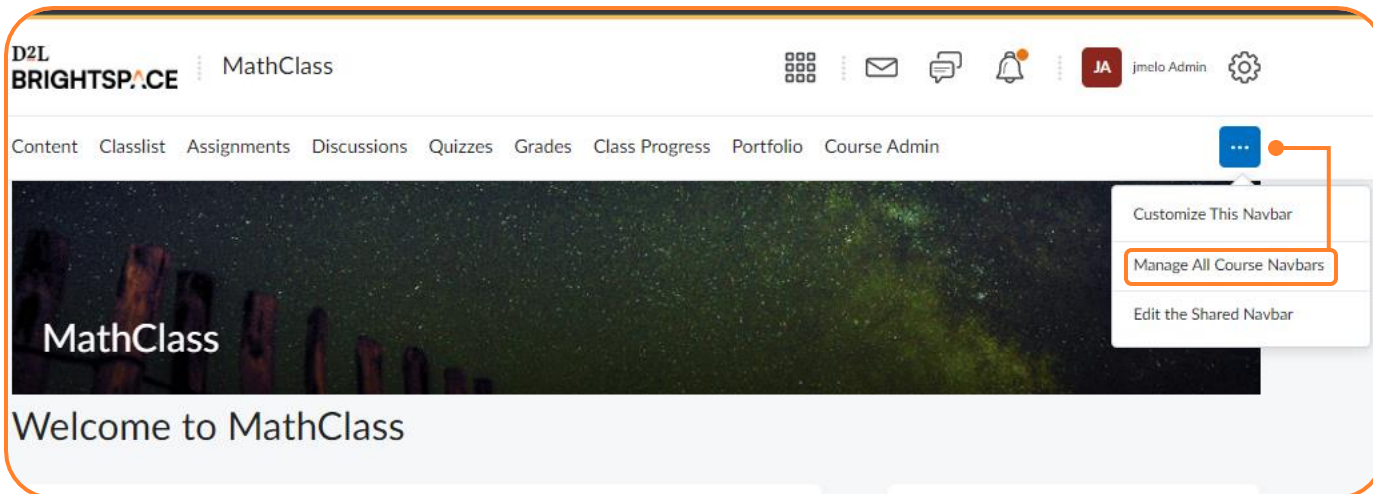

A screenshot of the Admin Tools interface. The top navigation bar includes 'Classlist', 'Assignments', 'Discussions', 'Quizzes', 'Grades', 'Class Progress', 'Portfolio', and 'Courses'. A dropdown menu is open, showing categories like 'User Related', 'Organization Related', 'Locale Management', 'Learning Activity Library', 'ePortfolio', and 'Learning Repository'. The 'Navigation & Themes' option is highlighted with an orange box.

## Course Admin > Navigation & Themes

A screenshot of the Course Admin interface. The top navigation bar includes 'Content', 'Classlist', 'Assignments', 'Discussions', 'Quizzes', 'Grades', 'Class Progress', 'Portfolio', and 'Course Admin'. A dropdown menu is open, showing 'Course Administration' and 'Site Setup'. The 'Navigation & Themes' option is highlighted with an orange box.

## Actions for Navbar > Manage

A screenshot of the Course Admin interface showing the 'Course Admin' dropdown menu. The menu options are 'Customize This Navbar', 'Manage All Course Navbars', and 'Edit the Shared Navbar'. The 'Manage All Course Navbars' option is highlighted with an orange box.

**TIP:** Avoid using\* Admin Tools workflow, unless your intent is to edit navbars/themes/links at the **Organization level** as initiating this workflow from within a course offering will redirect you to the organization level

# How to Create Themes

The screenshot shows the 'Create Theme' interface in D2L Brightspace. On the left, a sidebar menu has 'Themes' selected, and a 'Create Theme' button is highlighted. Below it, several theme options are listed, including 'Aimee's Sample Theme', 'Alex Test', 'BAS Homepage Theme', and 'BAS Homepage Theme - Slim Plus with Na'. The main content area is titled 'Create Theme' and includes a header for 'MathClass' with navigation links for 'Content', 'Assignments', 'Quizzes', 'Grades', 'Class Progress', and 'Course Admin'. The form contains a 'Name' field, a description field, a 'Logo' section with a preview of the 'D2L BRIGHTSPACE' logo and a file upload button, 'Primary Color' and 'Accent Color' sections with color selection options and a 'Preview' button, and a 'More Options' section with a 'Customize link destination' dropdown menu. A 'Cancel' button is at the bottom right.

**TIP:** SVG files are recommended for Logo Images for better scaling. 260 x 60 pixels is recommended, but will display at smaller sizes for smaller devices or when viewing a navbar with a course title

Configure a logo to appear in your navigation panel

Set a primary color to style various components of your course, including the navbar and select elements within the *Lessons* content experience, like unit containers

Set an accent color to style the thin strip that renders above the navigate panel

Set if / where users will be directed when clicking on the logo in your navigation panel

# Theme Considerations & Effective Practices

---

## Considerations

- Do you have a multi-tenant Learning Environment (multiple schools / departments / companies) within the same site? -- do you want to be able to brand by your branches within your org structure?
- Do you use New Content Experience (Lessons) – do you want all unit containers to reflect the primary color?
- Do you wish to direct traffic to your external website or customer's sites?

## Effective Practices

- Use the least number of themes as possible – themes can be a good visual queue to contextual the courses as belonging to something
- Be strategic with where you link your logo, if at all – there is also a floating 'home' to return users to organization page and course title to return users to course homepage (don't overcomplicate)

# How to Create Navbars

Navbars Themes Custom Links

Add Links

Enable Icon-Based Navbar

Theme

D2L BRIGHTSPACE MathClassTheme Change Theme

More Options

Change the title in the navbar

None  Org Unit Name  Custom

What replace strings can I use in a custom title?

**TIP:** If you are trying to change a logo that appears in your navbar, remember that this is a property of the associated theme – in such cases, you'll want to edit the linked theme and update the logo there

Configure which links render in your navbar and how (with or without an icon)

Associate your navbar to a theme to determine who it is styled

Configure if and what title is assigned to the course in the navbar. Use replace strings to pull in course properties into your title.

# Navbar Considerations & Effective Practices

---

## Considerations

- Consider which roles will access the org unit
- What is the tech literacy of your audience – will including icons serve as a distraction or make things more easily identifiable
- Do you have multiple courses with the same name – would including course code in the title help differentiate the similarly named courses
- Are you looking for additional ways to brand your learning environment – do icons help build continuity with applications or branding external to Brightspace?

## Effective Practices

- Include links for all role types (users will only see links for which they have permission)
- Only render course code in navbar title if they are unique – including non-unique course may further redundancy
- Use icon links for younger audiences
- Don't over-populate your navbar with every available tool – include only those that will be frequented
- Place frequented links near the left (we read left-to right in NA)

# How to Create Links

Add Existing Link

Create Link

**TIP:** Consider using link Groups to depopulate an overcrowded navbar and/or to organize links of a similar theme or category

Configure an icon that will render where icon-based navigation is in use

Add existing system or custom links and/or create new custom links to be added to the grouping

# Custom Link Considerations

---

## Considerations

- Are there certain tools that you wish to limit based on role or locale – link limiting cannot be done with systems links
- Will your course act as a launch pad to other applications or resources of information that are external to the learning environment – would you like to surface those out within the course navigation
- Are there certain ‘shortcuts’ you would like to take directly from the course homepage

## Effective Practices

- Use custom links to recreate system links that require role or locale limiting
- Create a custom link to reach a specific page that you frequent to reduce the number of clicks and create efficiency
- Create Group Links to help declutter an overpopulated navbar and direct users to like tools or resources

# What are Homepages & Widgets

---

## Homepages

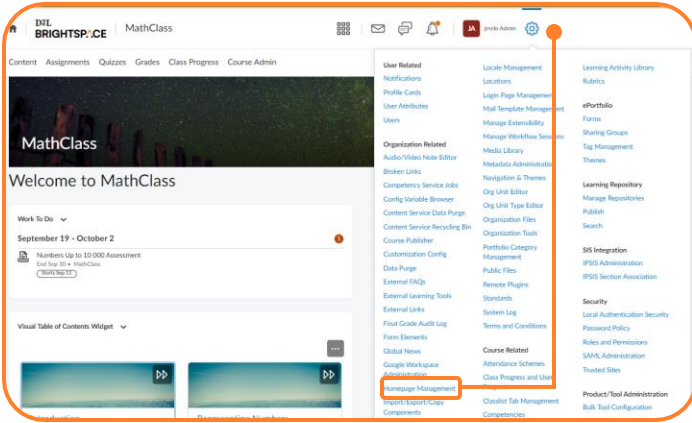

- Determines what information is presented to user upon accessing an org unit
- Typically, widget based, but can also be setup to direct users to a particular tool or URL
- Help to organize information and orient user within course

## Widgets

- 2 types of widgets: system widget and custom widgets
- Added to homepages to communicate information or offer additional navigational capabilities

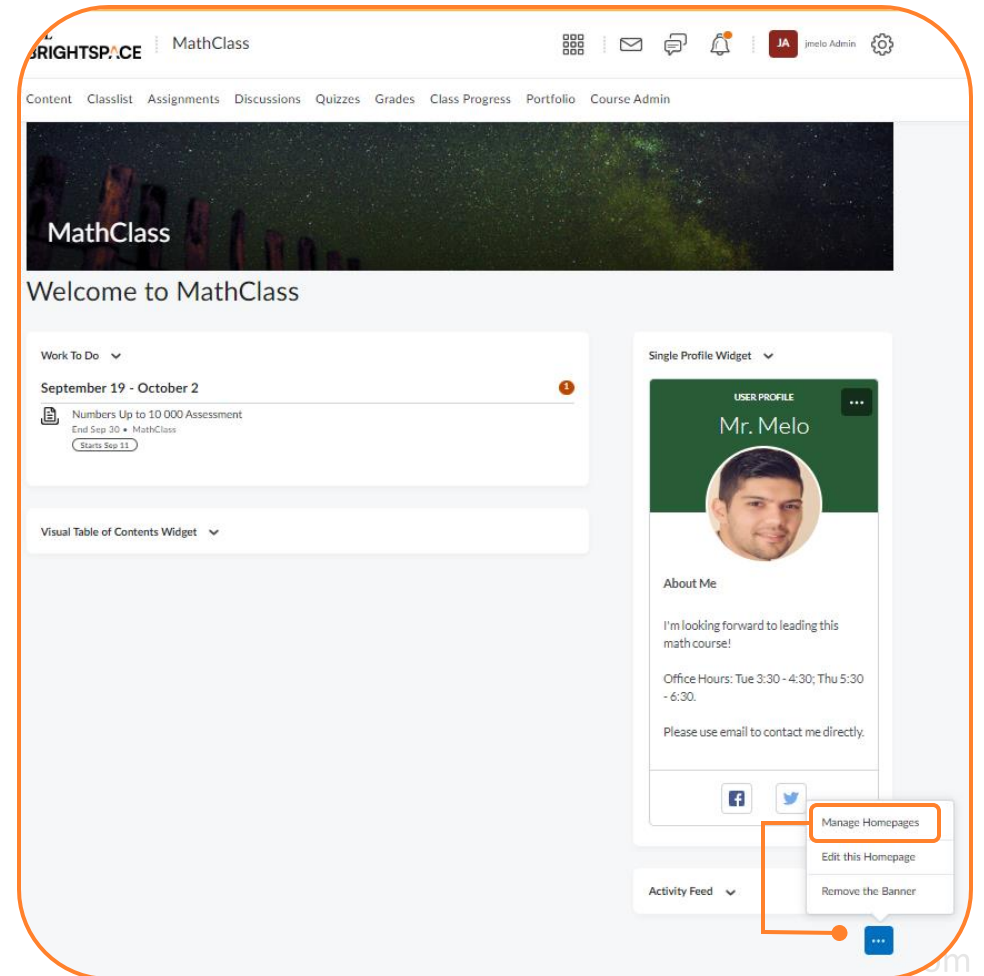

# Where to Access Homepages & Widgets?

## \*Admin Tools > Homepages

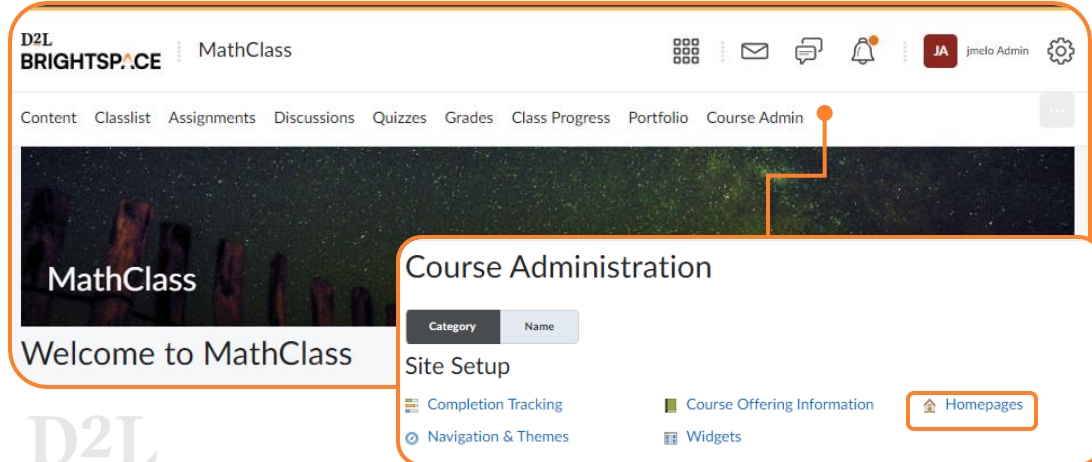

**TIP:** Avoid using \*Admin Tools workflow, unless your intent is to edit homepages/widgets at the **Organization** level as initiating this workflow from within a course offering will redirect you to the organization level

# How to Create Homepages

Choose from three types of Homepage Types:  
Widget, Tool, and External URL

The image displays three screenshots of the 'Create Homepage' form, each illustrating a different homepage type. The first screenshot shows the 'Widget-based' type, with a 'Type' dropdown set to 'Widget-based', a checked 'Include homepage header' checkbox, and a 'Layout' section showing a 'Basic' layout with two panels. The second screenshot shows the 'Tool' type, with a 'Type' dropdown set to 'Tool' and a 'Tool' dropdown set to 'Content'. The third screenshot shows the 'External URL' type, with a 'Type' dropdown set to 'External URL' and a 'URL' field containing 'https://d2l.com'. All screenshots include 'Name' and 'Description' input fields.

Configure if and what message renders in the header of the homepage. Use replace strings to pull in course properties into your message.

Choose from a set of eight different page layouts\*

Choose where to place which widgets, based on the chosen layout\*

Choose from a list of system tools to direct users to in the main page of your course

Set a URL to embed in the main page of your course

# Types of Homepages

 Webinar  
New Content Experience

**TIP:** When using Tool-Based Homepages that point directly to content, consider whether the New Learner Experience (Lessons) should be enabled

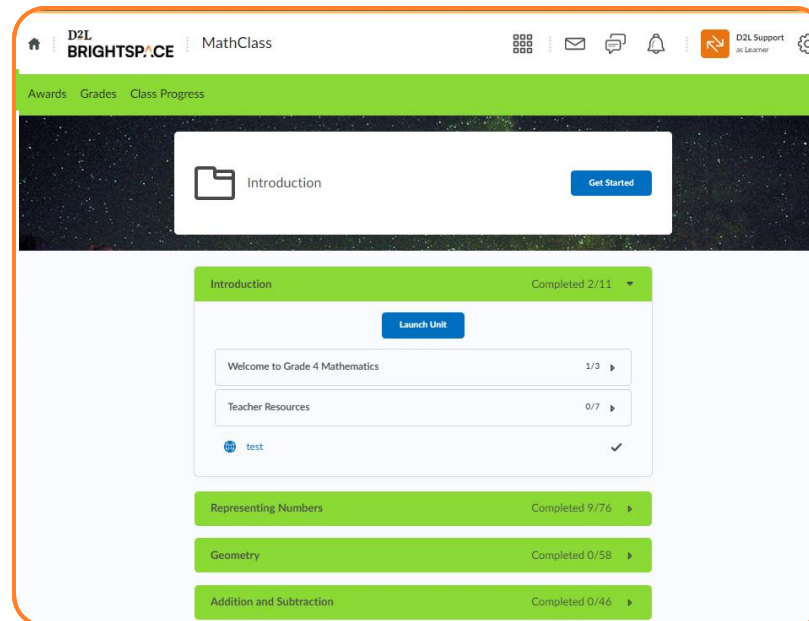

Widget-Based

Tool-Based

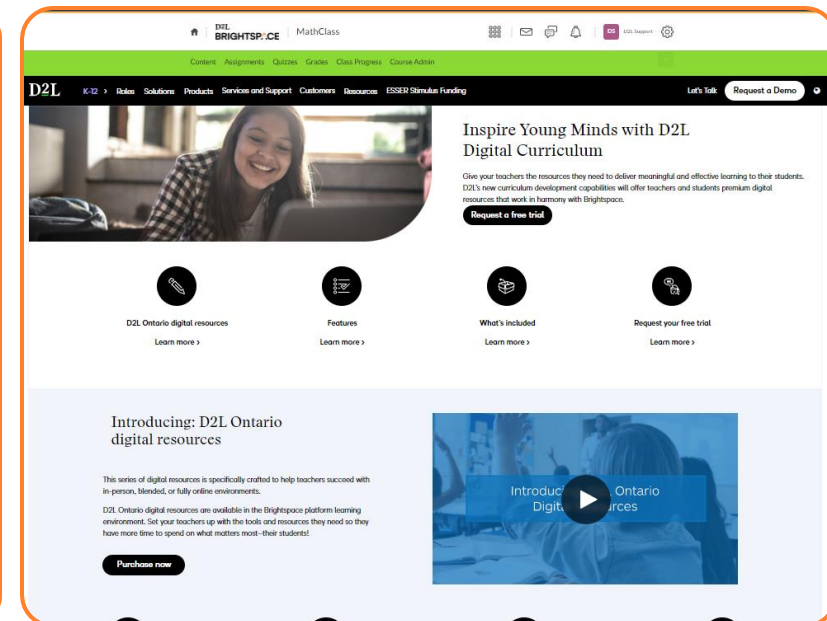

URL-Based

The screenshot shows a user's homepage in the D2L Brightspace MathClass interface. The header includes the D2L logo, course name 'MathClass', and navigation icons. Below the header, there are several widgets: a 'Work To Do' section for the current semester (September 19 - October 2) with a 'Numbers Up to 10 000 Assessment' due on Sep 30; a 'Visual Table of Contents Widget' showing 'Introduction' and 'Representing Numbers' with play buttons; and a 'Single Profile Widget' for 'Mr. Melo' with a profile picture and 'About Me' text.

The screenshot shows a user's homepage in the D2L Brightspace MathClass interface, displaying a course progress overview. The header includes the D2L logo, course name 'MathClass', and navigation icons. Below the header, there are several widgets: an 'Introduction' section with a 'Get Started' button; a 'Launch Unit' button; a 'Welcome to Grade 4 Mathematics' section with a progress indicator of 1/3; a 'Teacher Resources' section with a progress indicator of 0/7; and a 'test' section with a checkmark. Below these, there are three more sections: 'Representing Numbers' (Completed 9/76), 'Geometry' (Completed 0/58), and 'Addition and Subtraction' (Completed 0/46).

The screenshot shows a user's homepage in the D2L Brightspace MathClass interface, featuring a promotional banner for 'Inspire Young Minds with D2L Digital Curriculum'. The header includes the D2L logo, course name 'MathClass', and navigation icons. Below the header, there are several widgets: a 'Work To Do' section for the current semester (September 19 - October 2) with a 'Numbers Up to 10 000 Assessment' due on Sep 30; a 'Visual Table of Contents Widget' showing 'Introduction' and 'Representing Numbers' with play buttons; and a 'Single Profile Widget' for 'Mr. Melo' with a profile picture and 'About Me' text.

# Homepages Considerations

---

## Considerations

- Are different courses delivered differently?
- Are your courses instructor-lead?
- Do course designers need flexibility to change homepages at course level?
- how many widgets do you plan to use on your homepage
- will is the nature of the widget you're adding (is it static or dynamic? Will there be content stacked or added over time within the widget)

## Effective Practices

- Set your default homepage to reflect the needs of most of your courses
- Enforce Homepages if you want a uniform look / feel across all your courses
  - Assign a functional purpose for each container in the layout before you begin and place related widgets therein
- Put most important information at the top
- Avoid overcrowding your homepage and seek to remove redundancy

# How to Create Widgets

This screenshot shows the 'Widgets' menu in a system interface. The 'Create Widget' button is highlighted with an orange box. Below it, there are tabs for 'Custom Widgets' and 'System Widgets'. Under 'System Widgets', there is a 'System Widget List' table.

Name ▲	
Access Google Workspace	
Activity Feed	
Admin Tools	
Auditors	
Awards Leaderboard	

This screenshot shows the 'New Widget Properties' dialog box. It has three tabs: 'Properties', 'Release Conditions', and 'Content'. The 'Properties' tab is active. The dialog contains a 'Name' field with an asterisk, a 'Description' text area, and three buttons at the bottom: 'Save and Close', 'Save', and 'Cancel'.

This screenshot shows the 'New Widget Release Conditions' dialog box. It has three tabs: 'Properties', 'Release Conditions', and 'Content'. The 'Release Conditions' tab is active. It contains a 'Preview Widget' button, three buttons: 'Attach Existing', 'Create and Attach', and 'Remove All Conditions', and a message: 'There are no conditions attached to this item.'

This screenshot shows the 'New Widget Content' dialog box. It has three tabs: 'Properties', 'Release Conditions', and 'Content'. The 'Content' tab is active. It contains a 'Preview Widget' button, a 'Contents' section with a rich text editor toolbar (including Paragraph, Bold, Italic, Underline, Text Color, Background Color, Bulleted List, Numbered List, Link, Unlink, Table, Table of Contents, and Font Size), and a text area for entering content.

# Widget-Based Homepages

- ★ Homepage Banner is a property found in the **Course Offering Information** page, *not* in the homepage setup itself.

Navigation

Banner ★

Header

Widgets

The screenshot shows a course homepage for 'MathClass'. At the top, there is a navigation bar with the D2L BRIGHTSPACE logo and the course name 'MathClass'. Below the navigation bar is a large banner image with the text 'MathClass' overlaid. Underneath the banner is a header section with the text 'Welcome to MathClass'. The main content area is divided into two columns. The left column contains a 'Work To Do' section for the period 'September 18 - October 1', listing an assessment 'Numbers Up to 10 000 Assessment' that ends on Sep 30 and starts on Sep 12. Below this is a 'Visual Table of Contents Widget' showing two topic cards: 'Introduction' (18% complete, 2 of 11 topics completed) and 'Representing Numbers' (12% complete, 9 of 76 topics completed). The right column contains a 'Single Profile Widget' for 'Mr. Melo', including a profile picture, a bio, office hours (Tue 3:30 - 4:30; Thu 5:30 - 6:30), and contact information.

The screenshot shows the 'Course Offering Information' page for 'MathClass'. It includes a 'Course Image' section with a 'Browse' button and a note about supported image file types. The 'Homepage Banner' section has a checked checkbox for 'Display the image in a banner on the course homepage'. Below this are input fields for 'Course Offering Name \*' (containing 'MathClass') and 'Course Offering Code \*' (containing 'MathClass').

The screenshot shows the 'Create Homepage' page. It includes a 'Name \*' field with the placeholder 'Enter a Name'. The 'Description' field has the placeholder 'Enter a Description'. The 'Type' dropdown is set to 'Widget-based'. The 'Header' section has a checked checkbox for 'Include homepage header' and a field for '[OrgUnitName]'. The 'Layout' section shows a 'Basic' layout with two panels: one large panel and one small panel. There is a 'Change Layout' button. At the bottom, there is an 'Add Widgets' button.

# Cleaning Up Your Navbar / Homepages

- Consider if/whether your organization could operate on a single navbar or homepage (less is more) – can you get away with enforcing a specific homepage?
- Consider which roles have the ability to create / copy navbars / homepages
- Get an sense for how many navbars and homepages are available (shared) from the organization level
- Consider whether you wish to brand by org association (i.e. all courses that belong to department A will get navbar X and homepage Y)

Reporting on  
Themes/Navbars/Links/  
Homepages/Widgets

<https://desire2learn.brightidea.com/ideas/D9433>

**TIP:** If you are starting a cleanup project, upvote the PIE item on this page, then log a D2L Support case to request a report with these details

**BUT WHERE!?**

# Sharing and Activating

## Sharing

Determines if a navbar or homepage is available for use in descending org units.

## Activating

Determines which navbar or homepage is in use within a particular org unit

**TIP:** The share option is not available to objects created locally to a course offering. Because objects can only be shared 'down', the presence of the share option is a visual cue that you are creating or editing an object outside a course offering.

## Sharing

Share with child org units

## Active Navbar

Organization

Apply

## Active Homepage

Organisation

Apply

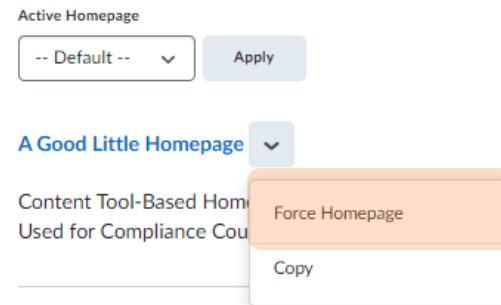

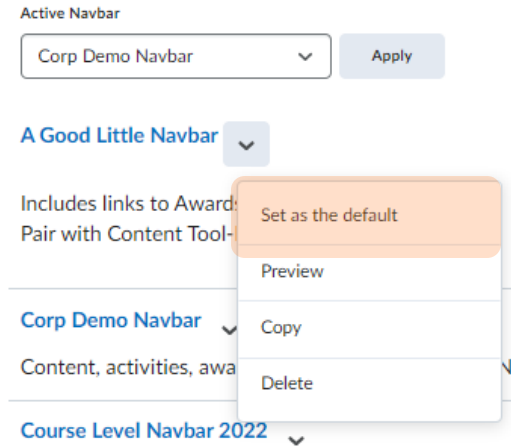

# Defaulting and Enforcing

## Defaulting

Determines which navbar or homepage is used during course creation

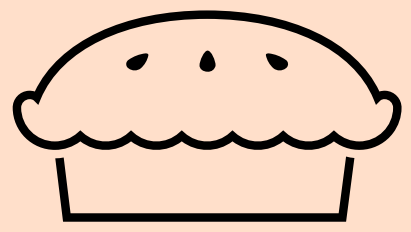

## Enforcing

Determines if a particular homepage is forced throughout the organization – must be defaulted first

**TIP:** If you have only one type of homepage you wish to use throughout your organization, enforce your default homepage to prevent other users from creating / propagating new homepages that may disrupt continuity in the user experience or violate your branding guideline.

Enforcing Navbars

<https://desire2learn.brightidea.com/ideas/D3962>

# Copying / Bulk Activating / Cascading Navbars and Homepages

## **Copy Course\***

Can be used to copy and activate a navbar and/or homepage into a **single** course

## **Copy Course Bulk (CCB)\***

Can be used to copy and activate navbars and/or homepages from a source course into **multiple** courses

## **Course Branding**

Can be used to copy, activate, and enforce navbars by association to a related org unit, effecting a cascading logic (all courses in Math department get navbar X and homepage Y)

\* Copy process is addition, which may introduce duplicates

Give us a ++ in the comments section to show your interest

Potential Webinar

**Course Branding**

# Where in the Org Structure to Create?

*Ask yourself this question...*

Should this **[object you are creating]** be used outside of **[Org Unit Type]**

Note: start at bottom of your org structure and repeat the question until you get a 'NO'— that's where you want to potentially create your theme or navbar.

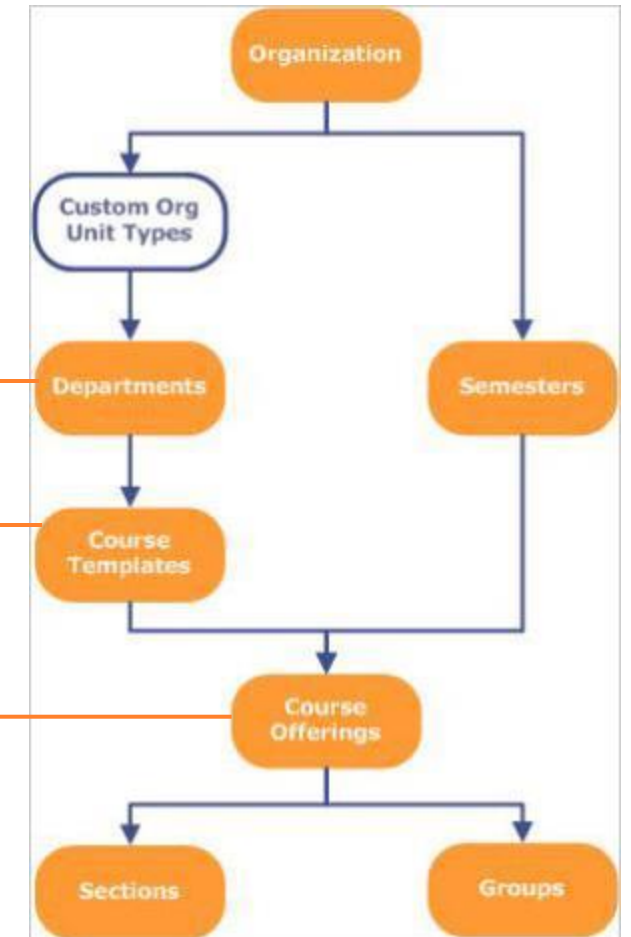

## Example:

Should this **navbar** be used outside **Course Offering** Math 101?

Should this **navbar** be used outside **Course Template** for Year 1 Math Courses?

Should this **navbar** be used outside **Department** of Math?

If you want to create a theme/navbar/link/homepage/widget that will be available to **ALL** org units, create it at the Organization level and configure sharing

# Case Study / Demo

A Very Fictitious Company that uses Brightspace internally for their compliance courses would like to roll out a new look and feel to their learning environment. They have recently rebranded, and the new theme of their company is 'green.'

Feedback from their user base has made them realize that with each course offering looking and feeling very different, their users are wasting precious time orienting themselves against the inconsistent navigation and layouts of each individual course. They are hoping to promote continuity in the learning experience by enforcing a consistent look/feel throughout their courses, and since their courses are not instructor-lead, following a more prescriptive learning path, they plan to do this by enforcing a new content tool-based homepage. They intent to pair this with a very simple navbar that contains only links to awards and discussions, the two tools commonly used within courses outside of content. To compliment this distraction-free learning experience, they've decided to turn on the New Learner Experience for Lessons which will help corral users through the expected materials and activities within the content tool.

At the organization level, they have different needs – here they want to maintain a traditional widget-based homepage where they can communicate organization announcements and surface a work-to-do widget to keep their learners on track, and an awards widget to motivate their employees. Also, on the homepage – and most predominantly – they want the 'my courses' widget. In the navbar, they want the same navbar, but some extra links added: 'Manager Dashboard' for tracking course completions, and 'Data Hub' for pulling data.

Finally, they want to ensure there is always a link to 'Course Administration', so have opted to include this on both the Organization Homepage and Course Homepage.
