

Help Enhance D2L Brightspace With Customized Solutions Built for You

Your ideas brought to life. Your ambitions turned into reality.

Your organization’s needs and goals are constantly evolving. Sometimes, an out-of-the-box solution simply won’t cut it. With Custom Development Services, our team of experts can work with your organization to create personalized solutions specific to your objectives.

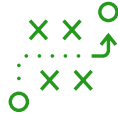

IMPROVE ACCESS AND COMMUNICATION

Custom Widgets

Help enhance the functionality of available content in your Homepages.

INCREASE EFFICIENCY

Platform Customization

can optimize, refine, extend and align Brightspace workflows.

EXPAND YOUR ELEARNING ECOSYSTEM

LTI Development

Helping ensure your tools are easy to access, trustworthy, and powerful.

YOU NEED IT. WE CAN HELP CREATE IT.

No one knows your organization better than you and your team. Work with our full-stack developers and Brightspace experts to scope and develop custom tools. Our team can lead you through the entire development cycle—from design to testing and deployment.

And it doesn’t end there. Get ongoing maintenance of your customizations to help see to their success over the long term.

CUSTOMIZED FUNCTION. FAMILIAR FEEL.

Solutions are deployed right within your Brightspace environment, so customizations look and feel like your platform. This approach also helps to maintain the accessibility standards that you already know and trust.

HAVE AN IDEA?

Let’s work together to help remove barriers and reach your goals faster. Contact one of our Brightspace experts here or reach out to your Customer Success Team to see what we can create.

“We teamed with the Creative Services team to **implement** 5 new widgets that were not part of our initial environment. They were very helpful and **efficient** in improving the **UI** for our learners.”

Katrina Stafford, LMS Administrator, ISTE
