

Experience Inclusive Design with the Brightspace Platform

Features designed for learners with disabilities prove useful for all learners.

E-READER SUPPORT

Built-in support for an e-reader (docReader) enables students with learning disabilities to receive simultaneous visual, audio, and cognitive reinforcement for better comprehension.

- All learners can use the e-reader to focus better or to multitask when unable to use their eyes for reading.

DOWNLOADABLE AUDIO VERSION

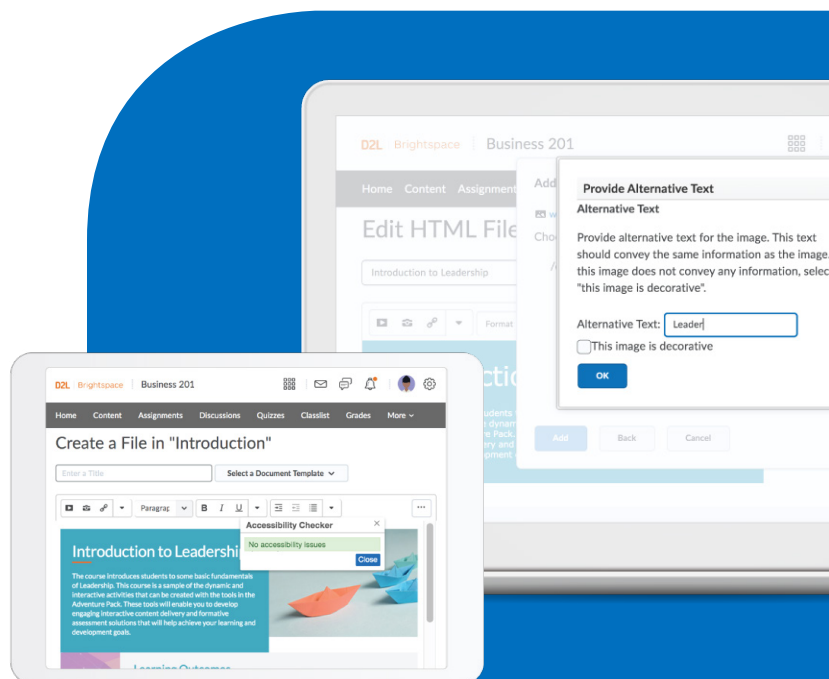

Being able to download an audio version of text for learners with vision impairments ensures that they have access to all of the content.

- All learners can download audio files for listening on their devices offline, especially while commuting.

RESPONSIVE DESIGN

The user interface has been created with responsive design, ensuring a seamless user experience for learners using screen magnification tools.

- Brightspace can work for everyone — no matter what device is used — and provides a consistent experience

“D2L was established to remove barriers to learning. We’re pulling vulnerable learners into the mix instead of pushing them away, by building technology in an accessible way.”

John Baker, CEO
D2L Corporation

AUTOMATED VIDEO CAPTIONS

Our Video Note™ tool provides automated, editable closed captions to enable instructors to create accessible videos for users who are Deaf or hard of hearing.

- Captions in videos are useful to everyone.

TARGETED SUPPORT FOR ASSESSMENT

Special access for timed activities provides extended time periods or alternative question sets in quizzes for learners with disabilities.

- Special access for timed activities is used by instructors to provide an alternative time period or alternative assessment to groups of learners, based on their varied learning requirements or choices.

PERSONALIZATION OPTIONS

Personalization options help learners with visual or cognitive disabilities customize and simplify their interface, especially for email and discussions.

- Personalization features can be used by all learners to provide the best experience possible.

FLEXIBLE SUPPORT FOR LEARNING

Instructors can provide remedial content to learners with disabilities when needed, or help them bypass some learning modules by using rules-based tools to automate the release of content.

- The automated release of content in Brightspace, which is based on what a learner does or doesn't do, helps instructors provide appropriate higher/lower levels of learning modules based on competency achieved.

About D2L

D2L believes learning is the foundation upon which all progress and achievement rests. Working closely with organizations globally, D2L has transformed the way millions of people learn online and in the classroom.
