

Performance+

The Performance+ package delivers powerful analytics tools to help administrators, educators, and learners save quality time while maximizing impact and driving success. Performance+ helps boost learner performance at every stage: An adaptive engine creates personalized learning paths for learners, and predictive analytics help identify at-risk learners. Rich data visualizations show what is working and what isn't—turn your data into information and then into knowledge, so you can take action at the learner, program, or organization level.

DATA-DRIVEN DECISIONS

With on-demand access to Advanced Analytics, the Insights tool and its interactive dashboards focus on adoption, assessment quality and engagement. You can be confident you're accessing up-to-date information to inform and direct your decision-making, helping improve adoption of the D2L Brightspace platform, learner engagement, retention, and completion rates.

DIG DEEPER INTO DATA AND VISUALIZATIONS

Communicate data results effectively across your organization using the data visualizations in Advanced Analytics—Insights Report Builder. Obtain fresh data, create requested reports, share reports with others, and reduce repetitive parts of the reporting process. Skip the data integration steps by putting the entire experience in a single location ready for you to succeed on first use.

PREDICTIVE ANALYTICS

Providing early identification of at-risk learners, predictive analytics empowers you to understand where issues exist and create an appropriate resolution plan. Intuitive dashboards transform complex learner data into easily identified patterns of engagement and academic risk. Integrated workflows help you quickly take prescriptive action to help improve the learning experience.

ADAPTIVE LEARNING PATHS

Adaptive learning creates a personalized, scalable learning experience by using learning objectives, content, and questions already created to set unique learning paths for each learner, helping them succeed in their own way. It automatically develops an understanding of each learner's progress against learning objectives and identifies where extra help is required.
