

D2L Accessibility Conformance Report

International Edition

(Based on VPAT® Version 2.5 INTL – Covers WCAG 2.2, Section 508 and EN 301 549)

Name of Product/Version	Achievement+
Report Date	March 31, 2025
Product Description	Achievement+ is a Brightspace add-on that constitutes outcome management and achievement reporting package to simplify tracking, reporting, and analyzing learner achievement across courses and programs.
Contact Information	Dr. Sambhavi Chandrashekar, Global Accessibility Lead accessibility@d2l.com

Notes

- This version of D2L's Accessibility Conformance Report (ACR) for Achievement+ reports
 - conformance with [WCAG 2.2](#) at Levels A, AA and AAA
 - compliance with [Section 508](#) of the Rehabilitation Act, 1973 revised in 2017
 - compliance with [EN 301 549](#) V3.2.1 (2021-03) – the Harmonised European Standard
- Compliance with the following regulations is also reflected in this report.
 - [ADA Title II new accessibility rule](#)
 - [European Accessibility Act](#)

Introduction

We report publicly on how the accessibility level of our products align with the World Wide Web Consortium’s Web Content Accessibility Guidelines (WCAG) 2.2 Level AAA standards, while regulatory requirements require up to WCAG 2.1 Level AA. Our accessibility efforts are not driven by compliance requirements but by our commitment to empower and engage individuals in their learning goals. We work towards providing an equitable user experience to users with disabilities by including accessibility considerations at every stage of development. We work closely with our customers to develop comprehensive solutions that are flexible to the individual needs of users in different roles such as teaching, learning and administration. We offer products that make it easy for users to navigate, understand, and respond to learning materials and activities using the assistive technologies that support their needs.

Accessibility best practices are built into our design and development processes. As part of quality assurance, our products are checked for compliance with the most up-to-date accessibility standards based on the Web Content Accessibility Guidelines (WCAG) 2.2 Levels A and AA. Instances of non-conformance are transparently reported as exceptions. We post updated versions of D2L’s Accessibility Conformance Reports on D2L’s Accessibility Standards page periodically.

Evaluation Methods Used

D2L's designers build and maintain design patterns and component specifications with accessibility and consistency in mind. Our publicly shared web components built in-house have accessibility coded into them. Our engineers use these web components as building blocks during product development. Accessibility tests are integrated into the unit testing and integration testing protocols of engineers. For this, they are trained and equipped with state-of-the-art automated accessibility testing tools. Success criteria not covered by the automated tests are covered by the manual testing protocols of our quality assurance testers, which include testing with assistive technologies. From the initial stages of product building to release and further maintenance our user experience design and engineering teams consult with our Senior Accessibility Strategist, who is a native screen reader user.

We also partner with a third-party accessibility testing company who provides us access to their community of people with disabilities using a variety of assistive technologies such as diverse screen readers, screen magnifiers, speech input, and switch access devices. Our teams recruit assistive technology users via their cloud-based platform for our accessibility research, design consultation and user testing.

Key test methods used are listed below, with acronym legends. These acronyms are referenced in the Remarks and Explanations column to indicate the tests used for each of the WCAG 2.2 success criteria and the functional criteria of Section 508 and EN 301 549 standards. These acronyms are repeated in the page footer for easy reference.

TBT – Tool-Based Testing using automated accessibility testing tools

CCT – Color Contrast Testing

SRT – Screen Reader Testing

SMT – Screen Magnifier Testing

MAT – Manual Accessibility Testing: Keyboard testing with visual focus; Videos; Inspection

UBT – User-Based Testing: Testing with Users with Disabilities (in-house and through partnership with a third-party company)

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.2	Level A - Yes Level AA - Yes Level AAA - Yes
Revised Section 508 standards published January 18, 2017, and corrected January 22, 2018	Yes
EN 301 549 Accessibility requirements for ICT products and services - V3.2.1 (2021-03)	Yes

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports:** The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports:** Some functionality of the product does not meet the criterion.
- **Does Not Support:** The majority of product functionality does not meet the criterion.
- **Not Applicable:** The criterion is not relevant to the product.
- **Not Evaluated:** The product has not been evaluated against the criterion.

WCAG 2.2 Report

Tables 1, 2 and 3 also document conformance with:

- EN 301 549: Chapter 9 - Web, Sections 10.1-10.4 of Chapter 10 - Non-Web documents, and Sections 11.1-11.4 and 11.8.2 of Chapter 11 - Non-Web Software (open and closed functionality), and Sections 12.1.2 and 12.2.4 of Chapter 12 – Documentation.
- Revised Section 508: Chapter 5 – 501.1 Scope, 504.2 Content Creation or Editing, and Chapter 6 – 602.3 Electronic Support Documentation.

Note: When reporting on conformance with the WCAG 2.2 Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the [WCAG 2.2 Conformance Requirements](#).
